

WAYPOINT

Personalized Travel Planner

Built by: Russell Han Josef & Simone Lue
Class: CSIS 4495 | Semester: Winter 2025
Instructor: Padmapriya Kandhadai

PROBLEM

- Too many travel apps focus on logistics, not personalization
- Travelers waste time Googling “things to do” and comparing endless options
- Existing tools don’t adapt to individual travel styles or preferences
- Real-time collaboration with friends is clunky or missing
- There’s little sense of progress or reward when planning

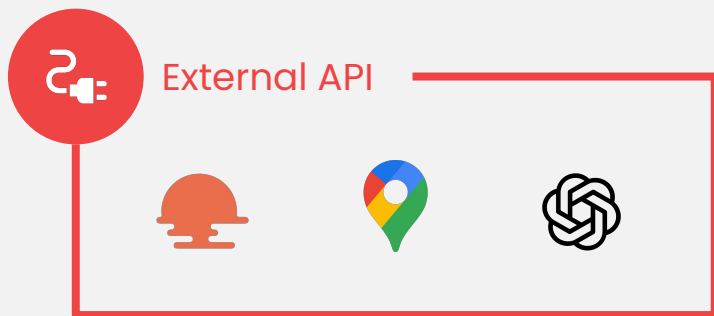

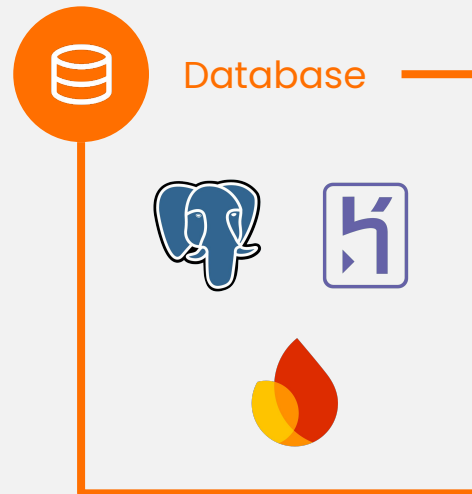

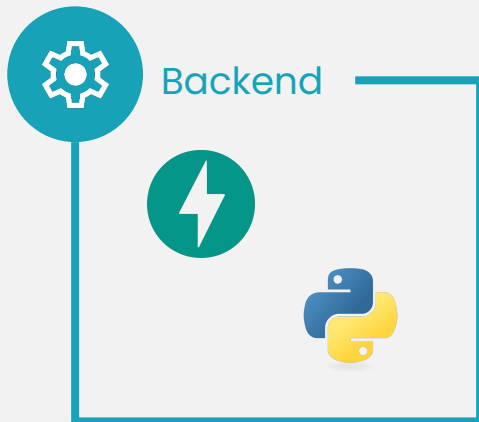

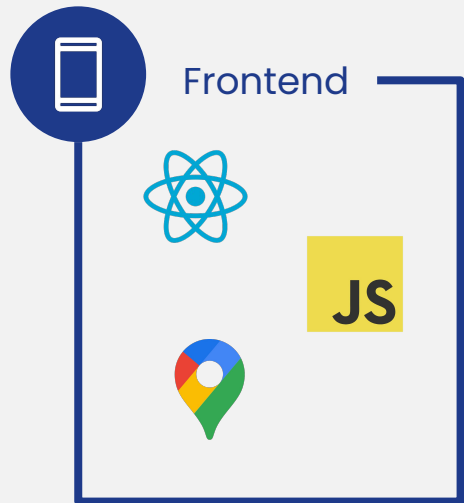

OBJECTIVE

- Recommend destinations and activities tailored to your travel style
- Help users plan smarter with AI-powered suggestions
- Enable real-time collaboration with friends on shared itineraries
- Add gamified achievements to make planning feel rewarding
