Feb 08, 2025	2	Started on the layout of the HomeScreen as well as its corresponding styling file.
		Added:
		- Search bar (text input)
		- Horizontal scroll for 'My Trips' (with placeholder trips set + default card for when there are no current trips added)
		
		Problems encountered:
		- Had trouble with using Carousel (react-native-snap-carousel)
		  - The dependencies had conflicts and version compatibility issues, specific issues with propTypes
		  - Nothing was working
		Alternate solution:
		- Used FlatList with horizontal scrolling instead

| Feb 08, 2025 | 2 | Started on the bottom navigation menu -> |

Started on the bottom navigation menu ->
Problem: Tried using external library for icons but icons would not show up properly (Question mark in the middle of a box shows up)
    - Issues with linking fonts with Xcode
Alternate plan: For now I am using emojis as a placeholder icon, will revisit adding external library of icons at a later time
Bottom Navigation now has seamless navigation between Home and Quiz screens ->
Quiz screen to be replaced at a later time, currently acting as a placeholder for other screens
